

COMIC ON E-WASTE & US

BY DIVYA SINGHAL

What is E-Waste? Why are you carrying this heavy box to drive when you can dump it in a bin? It is waste after all.

E-Waste is old, broken or damaged electrical appliance that is towards end of its life. Remember! E-waste can't be dumped in bins as it is more harmful than regular waste. It can be reduced only by recycling it.

Does E-waste affect environment?

E-waste has an adverse
terrible impact
on the environ-
ment. It is
threat to
marine life,
contaminates
ground, water,
pollutes air and
a lot more...
So, it can only
be recycled.
